## **DETAILED ACTION**

### ***Response to Amendment***

Amendment, filed on November 7, 2003, has been entered and acknowledged by the examiner.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 17 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 17, the applicant writes that the light emitting areas have a light-emitting layer provided between a first electrode layer and a second electrode layer opposing thereto; and then also writes that "a hole blocking layer, which allows electrons but not holes to pass therethrough, over the light-emitting areas". The examiner cannot find in the specification or drawings where the hole blocking layer is over the light-emitting area as the applicant has described light-emitting area in the instant claim to include the first and second electrodes and the light-emitting layer. This means that the hole-blocking layer must be over the whole light

Art Unit: 2879

emitting area unit which is the three items given which are first electrode layer, second electrode layer and light-emitting layer. The examiner notes that the word "over" means "in or at a position above or higher than".

Claim 20 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant writes in the claim that "over the light-emitting areas and non light emitting area to enhance insulating properties between the plurality of light emitting areas, a hole injection/transport layer and a hole blocking layer". The examiner notes that the applicant describes a light-emitting area in the claim as "having a light-emitting layer provided between a first electrode layer and a second electrode layer", thus a light-emitting area must have three items. The examiner can only conclude from the instant claim that the applicant wants the hole injection/transport layer and hole blocking layer to be over the light emitting area which means over the entire unit of first electrode layer, light-emitting layer and second electrode layer. The examiner notes that the word "over" means "in or at a position above or higher than".

Claims 18 and 19 are rejected for depending from a rejected claim.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2879

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites the limitation "the ... non light emitting area" in line 7. There is insufficient antecedent basis for this limitation in the claim.

### ***Response to Arguments***

Applicant's arguments filed November 7, 2003 have been fully considered but they are not persuasive. The examiner notes the claims have been amended; however, the examiner has a 112 1<sup>st</sup> problem with the amended claims.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory

Art Unit: 2879

action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
